The last session at this year's conference is an interactive panel discussion facilitated by Prof. Mitch Resnick from MIT Media Lab. The closing panel consists of leading university and industry researchers with strong opinions about digital technology and its relation to children and childhood. The topic for this session is the general question for this year's conference: 'How can interaction with digital creative tools support child development?' The panel reflects on theoretical frameworks and challenges for the design of new digital technologies for a new generation of children, discussing new trajectories to support children's learning, well-being, and sense-making. Panelists draw upon ideas from the papers,

demoes, tutorials, and keynotes presented at the IDC 2014 conference. IDC delegates have the opportunity to join the conversation, posing their own questions and comments. The closing panel concludes IDC 2014 by sharing ideas on how we can build tomorrow's technology – together.

Categories and Subject Descriptors

H.5.2 [Information Interfaces and Presentation]: User Interfaces – Theory and Methods, User-Centered Design

Keywords

Digital Creative Tools; Child Development
